Flutter Developer – Delhi

Description

We're looking for outstanding Flutter app developers with exceptional app development and logical skills to work in a team environment on mobile application. You will be working on designing and building android and IOS apps on Flutter while getting opportunity to work in Native iOS and Android apps as well.

You would spent lot of time integrating REST apis. Building and Optimising Android and iOS apps from scratch with designes provided.

Responsibilities

- Min 1 year of experience in App development.
- Understanding of Dart and Flutter libraries app development.
- Having good understanding of Android and iOS component systems.
- Have worked with at-least Java (Adroid) or Swift (iOS) application code.
- Understanding of Social Platform, Google Maps, Analytics Integrations.
- Knowledge of Push Notification & cloud based messaging.

This position is more about your attitude and aptitude than the tools and technologies you've used. You must have a passion for building innovative apps and take pride in your work. You should also have great analytical skills and the ability to handle complex modular software development.

If this sounds like you, we'd love to meet you!

- Experience with JSON, XML, JavaScript, and interfacing applications to server side API's.
- Solid grasp of algorithms, memory management, object oriented programming, MVC programming, and concurrent programming.
- Extensive experience detecting and correcting memory usage issues, as well as optimizing code for application performance.
- A solid understanding of mobile operating system fundamentals such as processes, inter-process communication, multi-threading primitives, race conditions and deadlocks.
- Good knowledge of Git version control systems.
- UX knowledge is plus but not mandatory.
- Should have a good attitude & aptitude skill.
- Only for candidates with B.E/B.Tech/MCA education.
